

MULTI-PURPOSE REFUSE/RECYCLING CART AND CONTAINER

Need a refuse/recycling truck that covers all bases? Check out the multi-purpose TC8100 Town & Country. This unit not only handles loose, bagged, bulk, and cart trash, but has the ability to unload containers up to 4 cubic yards.

Built with Hardox 450 steel:

- Body floor, sides and roof
- Hopper floor and sides
- Packer guides, track and shoes

CURBSIDE LOADING FEATURES

One man residential collection on the curbside:

- Easily load loose, bagged or bulk waste in hopper
- Accepts all sizes of American made roll carts

STREET-SIDE LOADING

Equipped to dump side load containers up to 4 cubic yards

Custom configuration models include:

- TC8000R for rear load containers
- TC8000E for Emco style containers
- TC8000P for Pak-Mor style containers
- TC8000T for Truxmore style containers

Available in 20 to 37
Cubic Yard Capacity
in Single, Tandem, and Tri-Axle

Designed, engineered and built for ease of operation

Imagine, uninterrupted collection of residential, multi-family and commercial containerized trash all with NO on-route equipment adjustments or detachments.

Available for installation on both conventional cab and low cab forward chassis.

Optional expandable loading hopper for yard waste/bulk items

Owners, mechanics and operators contribute to the highly productive TC8100 Town & Country.

The New **TC8100 Town & Country** is the most thought through refuse/recycling body built. Our design team spent countless hours with owners, mechanics, and operators to obtain their thoughts and opinions on what makes a great body. We have taken this information to our engineering department to build what we believe is the most versatile unit on the market.

We start with a safe and stable horizontal unloading system. Second, our large volume curbside receiving hopper is located so the operator has easy access to it. Other features include simple uncomplicated controls, curbside loose refuse and semi-automatic cart loading, 4 cubic yard street-side container loading, LED body and work lights. The **TC8100 Town & Country** is designed for maximum legal payloads. Our bodies are built in 20 to 37 yard capacities, with many custom configurations available in a simple, easy to maintain unit.
